Look Your Best!

Attractive, Conventional Basket Tags!

Our **H1** tag has a stylish shape and is designed to fit different types of basket hangers.

Our **H2** tag has attractive art that shows different colors for the different sun exposures possible for baskets. The attaching mechanism will work on multiple hanger styles.

The **H1** and **H2** tags have multiple pictures available for the common sun/part-sun/shade exposures. Also, consider our **Q2** sample on the next page for use as a conventional basket tag.

A winning choice for any basket program!

Unique Attaching Methods

Macore has developed two unique basket tags that attach for specific purposes.

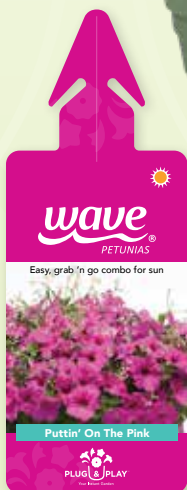

Our **Q2** push-on is specifically designed to wrap-around low on the basket wire. It can be attached at the time of shipping and slide to a gentle position on the plant material. All this while still being easily viewable.

Our **L6** hanging pot lock will work great with any pots that have the cut slots in the rim. This tag allows for large marketing spaces on front and back while being easy to read by a shopping gardener.
